Managing Through Crisis: Why a Connected Supply Chain Is Critical

- In today's unpredictable global environment, resilience isn't just a competitive edge—it's a necessity. This session explores how a truly connected supply chain empowers organizations to navigate disruption with speed, clarity and confidence. By leveraging real-time data, integrated technologies and seamless collaboration, businesses can identify risks early, adapt quickly and maintain operational continuity
- But connectivity isn't only about systems—it's about people. Strong relationships with suppliers, partners and stakeholders are the backbone of effective crisis response, enabling trust, transparency and smart decision-making. And when automation meets human insight, organizations unlock not just stability, but innovation and growth.
- Join us as we dive into real-world examples and emerging trends that show how connected supply chains—built on technology and trust—are redefining resilience in the face of crisis.· Route Optimization and Predictive Logistics
- SHORT VERSION:- In times of disruption, supply chain leaders need more than visibility—they need connectivity. This session explores how integrated technologies, real-time data, and strong partner relationships enable faster decisions, smarter risk management, and operational resilience. Learn how leading organizations are combining tech and human insight to navigate crises, drive innovation, and build supply chains that thrive under pressure.

FiFi4 Marine: Compact Li-Battery Fire-Extinguishing System for EV and Battery Cargo

- Lithium-ion battery and electric vehicle thermal runaway fires threaten cargo, personnel, and vessel safety.
- The FiFi4 Marine self-contained fire-extinguishing system addresses this risk by automatically deploying a biodegradable, non-corrosive foam instantly on detection of abnormal heat or gas levels.
- Already installed on marine-certified vessels, it has proven to suppress lithium battery and EV fires in seconds and fully extinguish them in minutes, limiting damage and preventing spread.
- The compact FiFi4 unit accommodates EVs and lithium battery cargo in the same container—no separate enclosure required.
